Notice of Allowance

Claims 1-36 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance:

As per independent claims 1,11,21, and 31, the prior art of record does not teach or reasonable suggest, either alone or in combination, all of the limitation of the claims.

Specifically the prior art does not teach a first and second cache both comprising multiple associative sets (i.e. not fully associative) wherein the collection of all addresses that map to a single associative set of a congruence group (i.e. a group of associativity sets a first cache) are mapped to each of the associative sets of a the second cache, where the associativity sets of the second cache are comprised within the same congruence group of associativity sets of the first cache.

Melton et al. (U.S. Patent No. 5,133,061) teaches using a randomization mechanism to when determining a congruence class (or associativity set) of a current cache access but does not teach a second cache and further a particular group of associativity sets of the second cache being able to cache all addresses of a single associativity set of the first cache.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
